Online work-shop on Communication skills -9th July 2021

Effective communication is vital to all in general and teachers in particular. Good communication skill is necessary in all walks of life. The lack of effective communication skills has a negative impact on the personal as well as professional life of a person. The communication skills are regarded as powerful tools in the hands of teachers since teaching is generally considered as only fifty percent knowledge and fifty percent interpersonal or communication skills.

Teachers should be aware of the importance of communication skills in teaching. They must also realize that all students have different levels of strengths and weaknesses. It is only through communication skills that a teacher can introduce creative and effective solutions to the problems of the students. Thus, a teacher can enhance the learning process.
